Volume I Number 4

Don Benz Santa Fe

SANTA FE

Don Benz kindly volunteered to host the August layout tour. Since our last visit, Don has been busy building locomotives and detailing the peninsula where the pool table once stood.

The cover shows an ABA lashup of F7's that Don detailed and painted in the "paleface" scheme. Don installed 7 individual light bulbs in the nose of the lead Intermountain unit. Lighting effects, including mars light, are Lenz DCC controlled. The trailing units are Stewart.

Thanks for sharing your layout, Don! **I**
